

Cleaning with Thermostar BEFORE - AFTER

Achieve unique cleanliness in your home
with the Thermostar Dry Steam System.

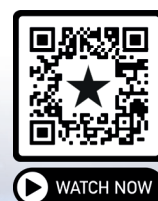

Cleanliness for life

Thermostar provides simple, sustainable and chemical-free solutions for the home. We bear the responsibility to conserve nature and reduce waste to save planet Earth as this is our legacy to our children.

Buy Thermostar products once, and they will serve you for a lifetime. Our products are developed and made to allow for replacement of individual components whenever needed. This saves money and preserves the environment.

A worldwide distribution network

Quality always prevails. Thermostar, established in 2008 with its headquarters in Austria, has built up a worldwide distribution network that is continuously growing. We have years of expertise and experience to understand and provide excellent cleaning solutions for every home. If you have any questions, please contact one of our authorised distributors.

Your saving, your benefit

Gain twofold! You can save power, effort and time when cleaning your home. We deliver a professional cleaning system that will help you achieve a non-toxic and healthy living place – because your health and your life are priceless.

Use ThermoStar technology to keep your home clean, modern and environmentally friendly. There is simply no better device to clean and maintain floors, windows, furniture and sanitary areas hygienically and without the use of harmful chemicals. By using pure tap water, you can avoid damage and toxic residues on sensitive surfaces, as well as preventing skin irritations, allergies and respiratory problems!

The environment will thank you! By using the Thermostar Dry Steam Cleaner you save on plastic waste and harmful waste water.

Cleaning was yesterday. Thermostar is today!
